

## **Carrier Process Equipment Group, Inc. (CPEG) Completes the Acquisition of Hebel, LLC**

(LOUISVILLE, KY, Nov. 25, 2024) Carrier Process Equipment Group, Inc. (CPEG), a worldwide leader in bulk material processing and handling solutions, announced that it has completed the acquisition of Hebel, LLC, a Buffalo, NY-based manufacturer of thermal processing solutions and supplier of lubrication and seal oil systems to the power generation, mining, and oil and gas industries. The acquisition, completed in November 2024, enhances the company's position as a leading provider of thermal processing solutions to the critical food, specialty chemical, pharmaceutical, minerals, and energy storage markets.

"The acquisition of Hebel brings the highly regarded Buflovak and Patterson Kelley brands into the CPEG group of companies and adds evaporation, distillation, and solidification capabilities to our extensive list of thermal processing solutions," said Doug Schieber, President and CEO of CPEG. "We also gain expanded access to the global mining and power generation industries with the addition of Hebel and Howard Marten and their strong OEM relationships."

Schieber continued, "This furthers our aim to supply greater value to our customers seeking a single-source provider for their process machinery needs. Customers can rely on our extensive engineering resources and integration capabilities."

Hebel, LLC consists of four companies: Buflovak, Patterson Kelley, Howard Marten, and Hebel, the oldest dating to 1880. Their products are used extensively in food, pharmaceutical, recycling, minerals, energy storage, and power generation industries. Engineering and manufacturing operations are in Tonawanda, NY, and Port Colburn, Ontario.

CPEG is a 100% employee-owned group of process machinery manufacturing businesses based in Louisville, KY. Its subsidiaries include Heyl Patterson Thermal Processing, Sly, S. Howes, Kinergy, Carrier Vibrating Equipment, Carrier Europe, and Carrier Shanghai. CPEG recently completed the addition of a world-class innovation center in Louisville, KY for the testing and development of complete bulk material processing solutions.
